

AUTO-TIP CHANGER CUM DRESSER

For Robot Welding Guns

Model : TCD-1600
(Without Colour Sensor)

After the welding tips are worn out, **Auto tip Changing cum Dresser** will automatically perform as under –

- Robot will go to Extractor station where tips will be automatically removed from electrode shanks and dumped into discard tray.
- Robot gun will pick Top & Bottom cap-tips automatically from magazine pre-loaded with caps.
- Robot will go to the Dressing station to dress both caps simultaneously and will start welding operation. The whole operation will take just 40 seconds as against 7 to 10 minutes by Manual operation.

Above all, it provides total safety as being fully automatic operation there is no need to go inside the Robotic cell.

Delivery Scope –

Auto Tip Changer cum Dresser consists of,

1. Extractor for used tips,
2. Reloading new caps station,
3. Motorised auto dressing unit,
4. Proximity switch for monitoring caps,
5. Caps refillable magazine unit,
6. Cap push-on plate,
7. Rigid stand.
